DETAILED ACTION

Applicant's response and amendment to the claims filed January 11, 2007 has been received and entered. Applicants have canceled claims 1-296 and added claims 297-350 generally directed to elected invention.

Applicant's election with traverse of the invention of group II (claims 174 and 214) filed January 30, 2006 was acknowledged. Applicants' argument of examining plurality of polynucleotide composition with the elected group comprising a method of treating anthrax was found not persuasive for the reasons set forth in office action dated 5/11/2006. Applicants also traversed the requirement of election of one SEQ ID No. Applicant's argument of examining other sequences with elected SEQ ID 4 and fragments, variants of SEQ ID NO: 4 such as SEQ ID 2, 6 and 8 were rejoined and examined as long as they are dependent on elected claims. The requirement was deemed proper and therefore made FINAL. Claims 136-138, 140-150, 152-173 and 175-214 were withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on January 30, 2006.

It is noted that, in response to office action dated 09/11/2007, applicants have amended independent claims to include distinct SEQ ID NO: (23-25) that was not previously presented or searched. Accordingly, a new election of species is required in view of newly added claims 297-350.

Claims 297-350 are pending and subject to further restriction in view of Applicants' amendment to the claims.

Election/Restrictions

Claims 297, 309, 320, 332, 343 are generic to the following disclosed patentably distinct species: wherein said nucleic acid fragment is codon optimized

and selected from the group consisting SEQ ID NO: 23, SEQ ID NO: 24 and SEQ ID NO. 25. The species are independent or distinct because as disclosed the different species have distinct structure and require separate search. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

There is an examination and search burden for these patentably distinct species due to distinct physical and chemical structure. The species require a different search in commercial database; and/or the prior art search for one sequence structure applicable to one species would not likely be applicable to another sequence.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is

the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
